

How to Get a Firecrawl API Key

Here are the detailed steps to obtain a Firecrawl API key from their website:

1. Navigate to <https://www.firecrawl.dev/app/api-keys> in your web browser
2. If you're not already logged in:
 - You'll be prompted to sign in to your Firecrawl account
 - Enter your email and password
 - If you don't have an account, look for a "Sign Up" or "Create Account" option
3. Once logged in, you'll be taken to the API Keys management page
4. Look for a button labeled "Create New API Key" or "Generate API Key" (usually prominently displayed)
5. Click the button to create a new API key
6. You may be asked to:
 - Name your API key (for your reference)
 - Select permissions/scopes for the key
 - Set usage limits or restrictions
7. Confirm your choices by clicking "Create" or "Generate"
8. Your new API key will be displayed on screen
 - **Important:** Copy and save this key immediately in a secure location as it may only be shown once
9. The key should now appear in your list of active API keys on the page
10. You can now use this API key in your applications by including it in your API requests according to Firecrawl's documentation

Remember to keep your API key secure and never share it publicly or commit it to public repositories.
